The TENANT shall be liable for any misuse of any plumbing fixture or equipment, including disposal of rubbish or garbage that damages any fixture or clogs any pipe. At the termination of the Lease the TENANT shall surrender the Premises with all keys to LANDLORD in the same condition as they now are, reasonable use and wear excepted. Should the TENANT fail to turn over all keys at the end of the Lease, the LANDLORD shall be permitted to replace the locks and keys immediately at TENANT'S sole cost and expense. The TENANT shall be responsible for all damage or loss caused to the Premises during the Lease, whether by TENANT or by any invitee or guest of TENANT, excluding acts of God or any injury or loss caused by the LANDLORD or for which the LANDLORD is statutorily liable. **SMOKING IS PROHIBITED.**

After Tenant has vacated the Premises, any personal property left behind will be stored by Landlord for up to twenty-one (21) days after Landlord sends notice to Tenant. Tenant shall pay a reasonable amount for any storage required. If Tenant does not claim the abandoned personal property, Landlord may dispose of the personal property in any manner Landlord chooses.
23. CASUALTY AND CONDEMNATION. If there shall occur a fire, damage or other casualty, or should the Premises be subject to an eminent domain taking by a government authority, in such a manner as to render the Premises legally uninhabitable or should sixty-five percent (65%) of the Premises be so taken, then Landlord or Tenant may terminate this Lease within forty-five (45) days of such casualty or taking, no other obligations to be owed by any party. Should Landlord elect not to terminate this Lease or should the casualty or taking not exceed sixty-five percent (65%) of the Premises, then the Rent owed by Tenant, other than Rent owed for any pet or any other additional Rent, shall be reduced by the amount of the casualty or other taking, and Landlord shall promptly rehabilitate the Premises, and shall continue to do so in a commercially reasonable manner. Upon the complete rehabilitation of the Premises, the Rent shall return to the level prior to the casualty or other taking.
24. NEGLIGENCE. Tenant shall be responsible for any negligence that causes any damage whatsoever to the Premises, whether the direct negligence of Tenant or Tenant's guests, invitees or licensees. LEAD EXPOSURE IS ESPECIALLY HARMFUL TO YOUNG CHILDREN AND PREGNANT WOMEN. BEFORE RENTING PRE-1978 HOUSING, LANDLORDS MUST DISCLOSE THE PRESENCE OF KNOWN LEAD-BASED PAINT HAZARDS IN THE DWELLING. TENANTS MUST ALSO RECEIVE A FEDERALLY APPROVED PAMPHLET ON LEAD POISONING PREVENTION.**

THE PARTIES FURTHER ACKNOWLEDGE THAT, UNDER MASSACHUSETTS LAW, WHENEVER A CHILD OR CHILDREN UNDER SIX YEARS OF AGE RESIDES IN ANY RESIDENTIAL PROPERTY IN WHICH ANY PAINT, PLASTER OR OTHER ACCESSIBLE MATERIAL CONTAINS DANGEROUS LEVELS OF LEAD, THE OWNER OF SAID PROPERTY MUST REMOVE OR COVER SAID PAINT, PLASTER OR OTHER MATERIAL SO AS TO MAKE IT INACCESSIBLE TO CHILDREN UNDER SIX YEARS OF AGE.

27. KEYS AND LOCKS. Upon the termination of this Lease, Tenant shall promptly return any and all keys to the Landlord. Tenant shall be responsible to Landlord for any and all damages resulting from Tenant's failure to return such keys. This provision shall survive the expiration of the Lease. Delivery of keys by the Tenant to the Landlord, or to anyone on Landlord's behalf, shall not constitute a surrender or acceptance of surrender of the Premises unless so stipulated in writing by the Landlord.
28. HAZARDOUS MATERIALS. Tenant shall not keep or have any dangerous, flammable, or explosive article or thing which might increase the chance of fire on the Premises, or that would ordinarily be considered "hazardous" or "extrahazardous" by any responsible person, other than in such amounts and in such manners as is typical to operate a household of Tenant's size.

- "Any failure by the tenant to comply in all respects with the provisions of the Master Deed of the Condominium or the Declaration of the Condominium Trust and the By-Laws and Rules and Regulations thereto, shall constitute a material default in this lease, and in the event of such default, the Trustees of the Condominium Trust shall have the following rights and remedies which the Trustees and the Unit Owners (other than the owner of the affected unit) have or may in the future have, against both the owner of the affected unit and the tenant, all rights and remedies of the Trustees and the Unit

Owners (other than the owner of the affected unit) being deemed at all times to be cumulative and not exclusive:

A. The Trustees shall have the right to give written notice of the default to both the tenant and the Unit Owner. Said notice shall be deemed properly given if left in any part of the unit addressed to the tenant, and mailed, postage pre-paid, registered or certified mail, return receipt requested, addressed to the owner of the unit as such address then appears on the records of Trustees, or by delivering said notice in hand, or by delivering said notice in any other manner permitted by law.

B. If the default continues for five (5) days after the giving of said notice, then the Trustees shall have the right to: Levy fines against the owner of the affected unit in accordance with any rule or regulation pertaining thereto and promulgated as provided in Section 5.14 of this Trust, and terminate the tenancy by giving notice in writing to quit to the tenant in any manner permitted by law, in the name of the landlord (Unit Owner) or in the name of the Trustees, or both. In case of a tenancy at will, the time of such notice shall be sufficient if it is equal to the interval between the days of rent payment, or thirty (30) days, whichever is longer. In case of a lease, seven (7) days' notice shall be sufficient. In either event, a copy of such notice to quit shall be delivered or mailed to the landlord (Unit Owner) in the manner set forth hereinabove. Thereafter, the Trustees may initiate and prosecute a summary process action against the tenant under the provisions of Massachusetts General Laws, Chapter 239, in the name of the landlord, or in the name of the Trustees, or both.

Contain a provision whereby the landlord/unit owner makes an assignment to the Condominium Trust of the rent due from the Tenant in an amount equal to any unpaid common charges assessed against the unit, and said provision shall further provide that the tenant shall be held harmless by the landlord/unit owner from any claim for non-payment of rent to the extent and amount of such payment by the tenant to the Condominium Trust of any past due common charges assessed to the unit.

Provide that the lease form must be countersigned by at least one condominium trustee then in office (or the manager of the condominium if one is then so employed) prior to being executed by the tenant, such countersignature being for the sole purpose of signifying that said lease form contains the provisions required by this Section 6.4.

The Trustees shall be entitled to levy a fine, or fines, or give a notice, or notices to quit followed by a summary process action or actions, and the Trustee's election to pursue any of the foregoing

remedies, either at the same time, or serially, shall be at their option in the event of any further default.

(c) All of the expenses of the Trustees in giving notice, and notices to quit, and maintaining and pursuing summary process actions and any appeals therefrom, shall be entirely at the expense of the owner of the affected unit, and such costs and expenses may be enforced and collected against the Unit Owner as if same were Common Expenses levied against the unit.

(d) The Unit Owner shall make reasonable efforts, at his/her expense and initiative to inform rental agents of the provisions of this section, and shall, at his/her own expense and initiative, furnish copies of the condominium documents to the tenant, and cause the lease or occupancy agreement to be prepared in conformity with the provisions of this section.

(e) Any renewal or extension of any lease or occupancy agreement shall be subject to the prior written approval of the Trustees in each instance. Such approval shall not limit any rights or remedies of the Trustees or Unit Owners in the event of a subsequent default.

(f) A true copy of the lease or occupancy agreement shall be delivered to the Trustees forthwith upon its execution.

(g) The provisions of this section shall take precedence over any other section in the lease or occupancy agreement.

(h) Notwithstanding anything to the contrary herein, and notwithstanding any custom, law, or usage to the contrary, it is expressly understood and agreed that neither the Trustees, nor the other Unit Owners, shall ever bear any personal or individual responsibility with respect to said lease or occupancy agreement.

(i) Notwithstanding anything to the contrary in this section or Trust or the By Laws, it is expressly understood and agreed that the provisions of this section shall not apply to any first mortgagee in possession of a unit following default by the Unit Owner in his/her mortgage, or holding title to a unit by virtue of a mortgage foreclosure proceeding, or deed or other agreement in lieu of foreclosure.

Tenant Lead Law Notification

What lead paint forms must owners of rental homes give to new tenants?

Before renting a home built before 1978, the property owner and the new tenant must sign two copies of this **Tenant Lead Law Notification** and **Tenant Certification Form**, and the property owner must give the tenant one of the signed copies to keep. If any of the following forms exist for the unit, tenants must also be given a copy of them: lead inspection or risk assessment report, Letter of Compliance, or Letter of Interim Control. **This form is for compliance with both Massachusetts and federal lead notification requirements.**

What is lead poisoning and who is at risk of becoming lead poisoned?

Lead poisoning is a disease. It is most dangerous for children under six years old. It can cause permanent harm to young children's brain, kidneys, nervous system and red blood cells. Even at low levels, lead in children's bodies can slow growth and cause learning and behavior problems. Young children are more easily and more seriously poisoned than others, but older children and adults can become lead poisoned too. Lead in the body of a pregnant woman can hurt her baby before birth and cause problems with the pregnancy. Adults who become lead poisoned can have problems having children, and can have high blood pressure, stomach problems, nerve problems, memory problems and muscle and joint pain.

How do children and adults become lead poisoned?

Lead is often found in paint on the inside and outside of homes built before 1978. The lead paint in these homes causes almost all lead poisoning in young children. The main way children get lead poisoning is from swallowing lead paint dust and chips. Lead is so harmful that even a small amount can poison a child. Lead paint under layers of nonleaded paint can still poison children, especially when it is disturbed, such as through normal wear and tear and home repair work.

Lead paint dust and chips in the home most often come from peeling or chipping lead painted surfaces; lead paint on moving parts of windows or on window parts that are rubbed by moving parts; lead paint on surfaces that get bumped or walked on, such as floors, porches, stairs, and woodwork; and lead paint on surfaces that stick out which a child may be able to mouth such as window sills.

Most lead poisoning is caused by children's normal behavior of putting their hands or other things in their mouths. If their hands or these objects have touched lead dust, this may add lead to their bodies. A child can also get lead from other sources, such as soil and water, but these rarely cause lead poisoning by themselves. Lead can be found in soil near old, lead-painted homes. If children play in bare, leaded soil, or eat vegetables or fruits grown in such soil, or if leaded soil is tracked into the home from outside and gets on children's hands or toys, lead may enter their bodies. Most adult lead poisoning is caused by adults breathing in or swallowing lead dust at work, or, if they live in older homes with lead paint, through home repairs.

How can you find out if someone is lead poisoned?

Most people who are lead poisoned do not have any special symptoms. The only way to find out if a child or adult is lead poisoned is to have his or her blood tested. Children in Massachusetts must be tested at least once a year from the time they are between nine months and one year old until they are four years old. Your doctor, other health care provider or Board of Health can do this. A lead poisoned child will need medical care. A home with lead paint must be deleaded for a lead poisoned child to get well.

What kind of homes are more likely to have lead paint?

In 1978, the United States government banned lead from house paint. Lead paint can be found in all types of homes built before 1978: single-family and multi-family; homes in cities, suburbs or the countryside; private housing or state or federal public housing. The older the home, the more likely it is to have lead paint. The older the paint, the higher its lead content is likely to be.

Can regular home repairs cause lead poisoning?

There is a danger of lead poisoning any time painted surfaces inside or outside the home are scraped for repainting, or woodwork is stripped or removed, or windows or walls are removed. This is because lead paint is found in almost all Massachusetts homes built before 1978, and so many of Massachusetts' homes are old. Special care must be taken whenever home repair work is done. No one should use power sanders, open flame torches, or heat guns to remove lead paint, since these methods create a lot of lead dust and fumes. Ask the owner of your home if a lead inspection has been done. The inspection report will tell you which surfaces have lead paint and need extra care in setting up for repair work, doing the repairs, and cleaning up afterwards. Temporarily move your family (especially children and pregnant women) out of the home while home repair work is being done and cleaned up. If this is not possible, tape up plastic sheets to completely seal off the area where the work is going on. No one should do repair work in older homes without learning about safe ways to do the work to reduce the danger of lead dust. Hundreds of cases of childhood and adult lead poisoning happen each year from home repair work.

What can you do to prevent lead poisoning?

- Talk to your child's doctor about lead.
- Have your child tested for lead at least once a year until he/she is four years old.
- Ask the owner if your home has been deleaded or call the state Childhood Lead Poisoning Prevention Program (CLPPP) at 1-800-532-9571, or your local Board of Health.
- Tell the owner if you have a new baby, or if a new child under six years old lives with you.
- If your home was deleaded, but has peeling paint, tell and write the owner. If he/she does not respond, call CLPPP or your local Board of Health.
- Make sure only safe methods are used to paint or make repairs to your home, and to clean up afterwards.
- If your home has not been deleaded, you can do some things to temporarily reduce the chances of your child becoming lead poisoned. You can clean your home regularly with paper towels and any household detergent and warm water to wipe up dust and loose paint chips. Rub hard to get rid of more lead. When you are done, put the dirty paper towels in a plastic bag and throw them out. The areas to clean most often are window wells, sills, and floors. Wash your child's hands often (especially before eating or sleeping) and wash your child's toys, bottles and pacifiers often. Make sure your child eats foods with lots of calcium and iron, and avoid foods and snacks that are high in fat. If you think your soil may have lead in it, have it tested. Use a door mat to help prevent dirt from getting into your home. Cover bare leaded dirt by planting grass or bushes, and use mats, bark mulch or other ground covers under swings and slides. Plant gardens away from old homes, or in pots using new soil. Remember, the only way to permanently lower the risk of your child getting lead poisoned is to have your home deleaded if it contains lead paint.

How do you find out where lead paint hazards may be in a home?

The only way to know for sure is to have a lead inspection or risk assessment done. The lead inspector will test the surfaces of your home and give the landlord and you a written report that tells you where there is lead in amounts that are a hazard by state law. For interim control, a temporary way to have your home made safe from lead hazards, a risk assessor does a lead inspection plus a risk assessment. During a risk assessment, the home is checked for the most serious lead hazards, which must be fixed right away

The risk assessor would give the landlord and you a written report of the areas with too much lead and the serious lead hazards. Lead inspectors and risk assessors have been trained, licensed by the Department of Public Health, and have experience using the state-approved methods for testing for lead paint. These methods are use of a sodium sulfide solution, a portable x-ray fluorescence machine or lab tests of paint samples. You can get a list of licensed lead inspectors and risk assessors from CLPPP.

In Massachusetts, what must the owner of a home built before 1978 do if a child under six years old lives there?

An owner of a home in Massachusetts built before 1978 must have the home inspected for lead if a child under six years old lives there. If lead hazards are found, the home must be delead or brought under interim control. Only a licensed deleader may do high-risk deleading work, such as removing lead paint or repairing chipping and peeling lead paint. You can get a list of licensed deleaders from the state Department of Labor and Workforce Development. Deleaders are trained to use safe methods to prepare to work, do the deleading, and clean up. Either a deleader, the owner or someone who works for the owner who is not a licensed deleader can do certain other deleading and interim control work. Owners and workers must have special training to perform the deleading tasks they may do. After the work is done, the lead inspector or risk assessor checks the home. He or she may take dust samples to test for lead, to make sure the home has been properly cleaned up. If everything is fine, he or she gives the owner a Letter of Compliance or Letter of Interim Control. After getting one of these letters, the owner must take care of the home and make sure there is no peeling paint.

What is a Letter of Compliance?

It is a legal letter under state law that says either that there are no lead paint hazards or that the home has been delead. The letter is signed and dated by a licensed lead inspector.

What is a Letter of Interim Control?

It is a legal letter under state law that says work necessary to make the home temporarily safe from serious lead hazards has been done. The letter is signed and dated by a licensed risk assessor. It is good for one year, but can be renewed for another year. The owner must fully delead the home and get a Letter of Compliance before the end of the second year.
